

Morning Paper Report - Friday, July 24, 2026

Recent, non-repeated papers matched to visual working memory, visual search, modeling, working-memory representation, neural-network memory models, AI for human memory, and egocentric predictive-coding memory themes.

1. Chess expertise improves rule-guided flexibility and visual working memory precision

Marjan Makhsous, Mohammad Jowkar, Ehsan Rezayat
2026

Source: Crossref; matched terms: visual working memory, working memory, precision, flexibility

Link: <https://doi.org/10.2139/ssrn.7166758>

Goal: Studying chess experts helps researchers understand how intensive practice shapes thinking skills

Method: Cognitive flexibility is the ability to adjust thoughts when rules or tasks change Working memory is the ability to hold and use information over short periods

Results: Chess players showed better accuracy in both tasks than controls

Conclusion: These results indicate that chess expertise may improve rule-guided flexibility and visual working memory precision in adolescents.

2. Neural dynamics of visual working memory representation during sensory distraction

J. K. Degutis, Simon Weber, J. Soch, John-Dylan Haynes
bioRxiv, 2025

Source: Semantic Scholar; matched terms: visual working memory, working memory representation, working memory

Link: <https://www.semanticscholar.org/paper/72d46fdce2e46f538c2f902615252a867ec3bd12>

Goal: Recent studies have provided evidence for the concurrent encoding of sensory percepts and visual working memory contents (VWM) across visual areas; however, it has remained unclear how these two types of representations are concurrently present

Method: Here, we reanalyzed an open-access fMRI dataset where participants memorized a sensory stimulus while simultaneously being presented with sensory distractors

Results: First, we found that the VWM code in several visual regions did not fully generalize between different time points, suggesting a dynamic code

Conclusion: First, we found that the VWM code in several visual regions did not fully generalize between different time points, suggesting a dynamic code

3. eLife Assessment: Neural dynamics of visual working memory representation during sensory distraction

Gui Xue
2025

Source: Crossref; matched terms: visual working memory, working memory representation, working memory

Link: <https://doi.org/10.7554/elife.99290.2.sa3>

Goal: The title and metadata suggest relevance to Lila's working-memory and attention topics, but no abstract was available from the source API.

Method: Method details were not available in the retrieved metadata.

Results: Result details were not available in the retrieved metadata.

Conclusion: Open the linked record to inspect the full abstract or paper before journal-club use.

4. Reviewer #1 (Public Review): Neural dynamics of visual working memory representation during sensory distraction

Authors unavailable

2024

Source: Crossref; matched terms: visual working memory, working memory representation, working memory

Link: <https://doi.org/10.7554/elife.99290.1.sa1>

Goal: The title and metadata suggest relevance to Lila's working-memory and attention topics, but no abstract was available from the source API.

Method: Method details were not available in the retrieved metadata.

Results: Result details were not available in the retrieved metadata.

Conclusion: Open the linked record to inspect the full abstract or paper before journal-club use.

5. eLife Assessment: Neural dynamics of visual working memory representation during sensory distraction

Gui Xue

2024

Source: Crossref; matched terms: visual working memory, working memory representation, working memory

Link: <https://doi.org/10.7554/elife.99290.1.sa2>

Goal: The title and metadata suggest relevance to Lila's working-memory and attention topics, but no abstract was available from the source API.

Method: Method details were not available in the retrieved metadata.

Results: Result details were not available in the retrieved metadata.

Conclusion: Open the linked record to inspect the full abstract or paper before journal-club use.
