

Morning Paper Report - Tuesday, August 25, 2026

Recent, non-repeated papers matched to visual working memory, visual search, modeling, working-memory representation, neural-network memory models, AI for human memory, and egocentric predictive-coding memory themes.

1. Electrical Stimulation of Visual Cortex Enhances Visual Working Memory Fidelity

Xinger Yu, Gengshi Hu, Geoffrey Woodman

Journal of Vision, 2025

Source: Crossref; matched terms: visual working memory, working memory, fidelity

Link: <https://doi.org/10.1167/jov.25.9.1988>

Goal: The title and metadata suggest relevance to Lila's working-memory and attention topics, but no abstract was available from the source API.

Method: Method details were not available in the retrieved metadata.

Results: Result details were not available in the retrieved metadata.

Conclusion: Open the linked record to inspect the full abstract or paper before journal-club use.

2. Biologically inspired computational models of Visuospatial Working Memory: A systematic review

Viviana Dueñas, Sonia López, José-Antonio Cervantes, Gerardo Ortiz-Torres

Cognitive Systems Research, 2025

Source: Crossref; matched terms: working memory, computational model, computational models

Link: <https://doi.org/10.1016/j.cogsys.2025.101410>

Goal: The title and metadata suggest relevance to Lila's working-memory and attention topics, but no abstract was available from the source API.

Method: Method details were not available in the retrieved metadata.

Results: Result details were not available in the retrieved metadata.

Conclusion: Open the linked record to inspect the full abstract or paper before journal-club use.

3. Construct Validity of the Stroop Color-Word Test: Influence of Speed of Visual Search, Verbal Fluency, Working Memory, Cognitive Flexibility, and Conflict Monitoring.

Periáñez JA, Lubrini G, García-Gutiérrez A, Ríos-Lago M

Archives of clinical neuropsychology : the official journal of the National Academy of Neuropsychologists, 2021

Source: PubMed; matched terms: visual search, working memory, flexibility

Link: <https://pubmed.ncbi.nlm.nih.gov/32514527/>

Goal: The title and metadata suggest relevance to Lila's working-memory and attention topics, but no abstract was available from the source API.

Method: Method details were not available in the retrieved metadata.

Results: Result details were not available in the retrieved metadata.

Conclusion: Open the linked record to inspect the full abstract or paper before journal-club use.

4. Computational Models of Working Memory for Language

Graham J. Hitch, Mark J. Hurlstone, Tom Hartley

The Cambridge Handbook of Working Memory and Language, 2022

Source: Crossref; matched terms: working memory, computational model, computational models, computational models of working memory

Link: <https://doi.org/10.1017/9781108955638.011>

Goal: The title and metadata suggest relevance to Lila's working-memory and attention topics, but no abstract was available from the source API.

Method: Method details were not available in the retrieved metadata.

Results: Result details were not available in the retrieved metadata.

Conclusion: Open the linked record to inspect the full abstract or paper before journal-club use.

5. Medial temporal lobe lesions reduce visual working memory precision.

Choo Y, Thakurdesai SP, Qadri A, Fruchet OE, Jackson SN, Chatterjee R, et al.

Brain, 2026

Source: Europe PMC; matched terms: visual working memory, working memory, precision

Link: <https://doi.org/10.1093/brain/awaf397>

Goal: The title and metadata suggest relevance to Lila's working-memory and attention topics, but no abstract was available from the source API.

Method: Method details were not available in the retrieved metadata.

Results: Result details were not available in the retrieved metadata.

Conclusion: Open the linked record to inspect the full abstract or paper before journal-club use.
